EXPERIENCE

FOUR13 GROUP

Associate Developer III

September 2024 - Present

- Developed and customized Shopify themes to create engaging, brand-aligned online stores, enhancing user experience and boosting customer engagement.
- Built custom features using advanced Shopify Plus tools, including Checkout UI Extensions, Customer Account UI Extensions, Shopify Product Discounts API, and Delivery Customization API.
- Integrated dynamic data with GraphQL and Shopify Storefront API to power personalized shopping experiences and optimize performance.
- Ensured all web pages were mobile-responsive and accessible, adhering to best practices for a consistent experience across devices.
- Built and optimized custom storefronts using Shopify Hydrogen (Remix framework) for fast, headless commerce implementations.

CERTIFICATES

CISCO NETWORKING ACADEMY

- Introduction to Cybersecurity
- Introduction to Networks
- Switching, Routing, and Wireless Essentials Certificate

RUSHMEDIA SOLUTIONS

Full Stack Developer

July 2023 - September 2024

- Responsible for maintaining and enhancing existing systems to ensure stability and performance.
- Develop new products, converting Figma designs into high-quality, functional code within project timelines.
- Prioritize a mobile-friendly approach, ensuring all webpages are responsive across devices.
- Skilled in TypeScript, Next.js, Tailwind CSS, GraphQL, Node.js, MySQL, and integrating the Facebook API.

XU LIB XENTRY SYSTEM

Full Stack Developer

February 2023 - Present (Maintainer)

- Developed an Entry-Exit and Space reservation system for Xavier University Library, incorporating user information management, occupancy statistics, and reservation tracking to enhance library space utilization
- Built the application's infrastructure using MySQL for database management, with a MERN stack (ReactJS, ExpressJS, NodeJS) for seamless front-end and back-end integration.
- Implemented and maintained features based on client requests, ensuring the system met evolving requirements and provided a smooth user experience for both library staff and patrons.

WELA ONLINE CORP

Developer

August 2022 - November 2022 (Intern)

- Developed and customized ERPNext modules to meet unique client requirements, delivering high-impact features that enhanced user experience and business functionality.
- Enhanced backend functionality using Python and JavaScript, optimizing system performance and streamlining data workflows.
- Collaborated with cross-functional teams to identify and implement solutions, ensuring seamless integration of new features within the ERPNext framework.
